

I am very ashamed of our FCC folks, for not realizing the total interference to other communications media that BPL will put out. This interference is against all other FCC Rules set forth to the other comm. sector, with no regards to anyone. The FCC just does for whomever donates the most dollars. It's a money thing. BPL is NOT an advancement of technologys. Everyone has phone service. If they do not, they can't afford a computer either. BPL has been tried other places, and proven to be bad. Get real, FCC!
